Part III DETAILED ACTION

Claims 1-23 are currently pending.

Election of Species Requirement

Election of species should be required prior to a search on the merits in all applications containing both species claims and generic or Markush claims.(MPEP 808.01(a))

Claims 1-23 are individually or dependently directed to a plurality of disclosed patentably distinct species of locations of sequence pairs, clones, and terminal sequences. For the purposes of initial examination on merits, Applicant is required to elect a single disclosed species of each for:

- I) one of the locations of pair of correspondent sequences, as in claims 8,9;
- II) one of clones, as in claims 11-14;
- III) one of characteristics of frequency of terminal sequences, as in claims 15-18.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1631

To be complete, a response to the election of species requirement should include a proper election along with a listing of all claims readable thereon, including any claims subsequently added. MPEP 809.02(a).
